

**The 9<sup>th</sup> International Lymphedema Framework Conference**

**CHICAGO. USA    June 13-15<sup>th</sup>, 2019**

**Special Patient Summit**

**Risk Reduction for the Management of Lymphedema**

**Presenter: Julia Rodrick, OTR/L; CLT-LANA; WCC**

**Lymphedema is a chronic condition which requires a creative, multifaceted approach for successful, long-term management. Typically, the diagnosis of lymphedema is coupled with defeating, descriptive words like incurable, debilitating and progressive, irreversible, rare and mysterious.**

**The truth is, living with lymphedema is no picnic but it doesn't have to be a "hopeless disaster". This course is designed to empower and encouraged those who live in the trenches of lymphatic dysfunction and are ready to "think outside the box" when it comes to successful risk reduction and management of lymphedema. It's time to take a practical, problem-solving approach to the possible applications of Complete Decongestive Therapies (CDT) while faced with the realities and demands of life with lymphedema.**
