For Physician/Nurses Intensive

Presentation: Anatomy and Physiology, Friday, June 14, 2019, 8:30 AM

This presentation will give an overview of macroanatomy and microanatomy of the lymphatic system and lymphatic physiology including the interface between the lymphatic and blood vascular systems, fluid dynamics in the interstitium, and factors influencing lymphatic pumping function. The presentation will also touch on the pathophysiology of peripheral edema and lymphedema.

For Patient Summit

Presentation: Components of CDT, Friday, June 14, 2019, 2:15 PM

This presentation will give an overview of the components of Complete Decongestive Therapy, which is still the standard of care for treatment of lymphedema, including the rationale for CDT as a whole and for each of the components. It will also discuss the importance of adherence to the standard of care for lymphedema treatment in order to optimize outcomes.
